ABOUT THE ORGANISATION, THE COMMITTEE AND THE FORUM

The Organisation of Islamic Cooperation¹

The Organisation of Islamic Cooperation (OIC) is an inter-governmental organization with 57 member states over four continents. The Organization was established upon a decision of the Summit, which took place on 25 September 1969. The organization has been headed by the Secretary General, Mr. lyad Ameen Madani, since January 2014.

The present Charter of the Organization was adopted by the Eleventh Islamic Summit held in Dakar on 13-14 March 2008, which laid down the objectives and principles of the organization and fundamental purposes to strengthen the solidarity and cooperation among the Member States. Over the last 40 years, the membership has grown from its founding members of 25 to 57 states.

Standing Committee for Economic and Commercial Cooperation of the Organisation of Islamic Cooperation²

As one of the four Standing Committees of the OIC, The Standing Committee for Economic and Commercial Cooperation of the Organization of the Islamic Cooperation (COMCEC) was established by the Third Islamic Summit Conference in 1981. Chaired by the President of the Republic of Turkey, it is the main multilateral economic and commercial cooperation platform of the Islamic world. COMCEC convenes annually, usually in October or November, at ministerial level in İstanbul.

Some of its objectives are to address the economic challenges of the Islamic Ummah, to contribute to the development efforts of the Member States, to draw up programs and submit proposals designed to increase the welfare of the Member States, and to ensure the overall coordination of the activities of the OIC relating to economic and commercial cooperation among the Member States.

The Organisation of Islamic Cooperation Member States' Stock Exchanges Forum³

Initiated consequently to the 20th Session of COMCEC, The Organization of Islamic Cooperation Member States' Stock Exchanges Forum was launched as a framework of cooperation, which also explores ways to improve global trading and liquidity of Islamic Finance instruments.

As a significant step in the progress of strengthening cooperation among the OIC stock exchanges, the formation of the Organization of Islamic Cooperation (OIC) Member States' Stock Exchanges Forum is an important milestone. It aims to provide a dedicated platform and communication channel for representatives of the relevant OIC organizations and institutions to discuss international cooperation activities and will offer participants the opportunity to share their experiences.

FOREWORD BY BORSA ISTANBUL CEO

As a step towards improving an area of development, we need to measure the constituents of success and risks that are correlated with it. With the help of this valuable source of consolidated information, we aim to take a broad picture of the OIC Member States' capital markets in order to better shape our strategies, and provide an insight to the local and global investors.

As agreed in the 7th meeting of the OIC Member States' Stock Exchanges Forum in 2013, Borsa İstanbul as the Forum Coordinator presents the second issue of the Integrated Statistical Report, which covers 2013-2014 periods of the exchanges and the central securities depositories of the OIC Member States.

As part of the specialized yet collective initiatives of cooperation amongst the OIC states, the OIC Exchanges Forum needs to be well positioned to be able to take advantage of the global economic and financial recovery. One of the critical steps of achieving this goal is to furthering integration among member countries and leading the consolidation trend of the global capital and financial marketplaces.

Historically, trading has bound our cultures together. We have gained much experience and knowledge because of our commercial interactions throughout history. Although the types of goods and services traded have changed over time, our shared values and high ethical standards have supported the momentum. From now on, we should not only take advantage of these invaluable pillars of trading built with great hardships over time, but also take the easier steps of building a connecting dome around them in order to establish new common marketplaces.

As the Forum of capital and financial marketplace operators, we strive to meet our responsibilities to bridge the values of the past and the accessibility of the present in order to lead our future. In 2014, many of our exchanges have signed Memorandum of Understandings with each other and other global institutions. Initiatives of higher connectivity are realized through data vending agreements, strategic partnerships, consolidation initiatives of national exchanges, competitive new products and services, common indices and more in progress.

In preparing the Report, we would like to give special thanks to all participants for their continuing support of the Report. We hope that you will find the information presented in the Report useful.

Tuncay Dinç
President of the OIC Member
States' Stock Exchanges Forum

MARKET HIGHLIGHTS

The economic growth rates of the emerging and OIC economies have been higher than the developed countries on average with 4% and 4.4% compared to 1.8% respectively. Yet, the expected withdrawal of investments as a result of the end of quantitative easing in the U.S. poses a risk for the OIC capital markets as well. Political tension in the Muslim regions has also been contributing to the stagnation trend. Besides the constrained growth in China, declining commodities prices have also affected the OIC states that export commodities such as metals, cocoa, coffee and cotton.

Represented by the 58 WFE member stock exchanges, the global capital markets have recovered to their pre-crisis states, namely 2007, around mid-2014 in terms of market capitalization. The level has been increasing ever since, reaching to \$65.1 trillion by the end of 2014. The top three WFE exchanges with the largest market capitalizations⁴ constituted 48% of the market capitalization of the WFE Exchanges and the top 10 constituted 77%. The number of IPOs has increased by 24.3% to 1421, and the total investment flows increased by 22.6% to \$894 billion.

Global Islamic assets are estimated to have risen from \$1.8 trillion in 2013 to \$2.1 trillion in 2014⁵.

The traded values of WFE and OIC exchanges for equities have increased by 18% to \$81 trillion and 25% to \$1.5 trillion respectively. The number of equities instruments and their value of trading at the OIC Exchanges have been 2% of the total values of WFE exchanges. The number of trades executed at the OIC Exchanges has increased by 23.7%. OIC Exchanges had 2.1% of the WFE trading value for domestic public debt securities, 0.6% of the domestic corporate bonds, and 5.5% of the foreign debt instruments.

The weighted average rate of change of the OIC Exchanges' benchmark indices based on their market capitalization has been 7.2% in 2014. The rate of change was -1.8% for the MSCI Emerging Markets Index, 5.5% for the MSCI World Index, and 4.4% for the MSCI ACWI⁶ Investable Market Index. 15 out of 23 OIC indices had positive returns in 2014.

SURVEY BACKGROUND

Following the resolution adopted at the 8th meeting of the OIC Exchanges Forum in 2014, the integrated statistics report now includes information regarding the central securities depositories of the OIC member states in addition to the stock exchanges. The survey has also been sent to the commodity exchanges in order to fully capture the common capital markets instruments across all exchanges.

A newly standardized survey format has been generated this year. In order to avoid misinterpretations of the terms used in the survey, OIC exchanges have been provided with a glossary of definitions as a reference when answering the questions—which are the same or derived versions of the definitions used by exchange networks such as WFE. You may find the glossary of these terms on the Forum's website⁷.

The survey consisted of questions for exchanges and central securities depositories separately. The electronic survey file has been e-mailed to OIC exchanges with directions, which also included a request for the file to be shared with the CSDs that serve to the exchanges. This report merely puts together the data provided by our members in order to generate a valuable report regarding the capital markets of the OIC members. Additionally, sources such as the WFE database have been used to collect data for the institutions who have not participated in the survey.

There are 42 national and 2 regional stock exchanges, 11 commodity exchanges, 1 currency exchange and 20 central securities depositories in 46 out of 57 OIC member states in our database. Of these institutions, 20 stock exchanges, 1 commodities exchange and 8 central securities depositories⁸ have responded to the survey. In order to extend the coverage of the report, we have also included 5 more exchanges based on the public data provided on the official websites of the institutions, WFE⁹, and FEAS¹⁰.

The Report is composed of key statistics on each institution as well as an aggregate analysis of the information in comparison with global markets. All major markets and products are categorized and "other" fields are added for our members to be able to provide data for the less common products. Fact sheets of the respondents have been included in the "Annex: Individual Responses" section.

The patterns, trends, and other results presented in this report are based on the sets of 25 exchanges and 12 depositories. Therefore, these sets will be referred as "OIC Exchanges" and "OIC CSDs" collectively and the institutions will be sorted and referred by their official or representative acronyms individually throughout the report.

Number of Listed Companies

The number of listed domestic companies has increased by 1% to 4,949, while the number of foreign companies was 41 at the end of 2014. The shares of Bursa Malaysia (18%), Karachi Stock Exchange (11%), Indonesia Stock Exchange (10%), and Lahore Stock Exchange (9%) make up 48% of the number of companies. Below chart displays the total number of companies listed at the OIC Exchanges:

9

 $^{^{13}}$ Iran Fara Bourse also has a construction fund which had a trading value of \$2.2 million in 2014

Number of New Companies

There have been 126 IPOs and 37 other offerings¹⁴ in 2014—a total of 163 offerings. Below chart displays the number of new companies listed through IPOs and other corporate actions*:

Funds Raised from Public Offerings

Funds raised from public offerings were \$31.9 billion—85% more than the amount for 2013. Both the number of new companies and the funds raised constituted 4% of the WFE amount.*

¹⁴ The number of companies whose shares were admitted to listing during the period through a procedure different from an IPO (e.g. splits, mergers, or having already floated shares)

^{*} Data could not be found for Bahrain Bourse, Nigerian Stock Exchange, Lahore Stock Exchange

Market Capitalization

OIC Exchanges' market capitalization rose to \$2.7 trillion with an 8% increase. The share of the market capitalization of the OIC Exchanges to the WFE Exchanges has remained at 4% in 2014.

The ratios for the top three and top 10 exchanges¹⁵ among OIC Exchanges were 53% and 85% respectively—indicating a higher concentration for the top exchanges.

The average ratio of the market capitalizations of the OIC Exchanges to the GDP values of their respective countries is 37% for the end of 2014.

Securitized Derivatives¹⁷

The value of securitized derivatives traded at the OIC Exchanges has increased by 30% to \$3.6 billion in 2014, and the number of products has reached to 1,326 with a 62% increase. Only Borsa İstanbul, Bursa Malaysia, Iran Fara Bourse and Tehran Stock Exchange have securitized derivatives with 640, 527, 48 and 111 products and trading value of \$2.5 billion, \$0.7 billion, \$0.4 billion and \$0.8 million respectively.

Exchange Traded Funds (ETFs)

8 OIC Exchanges¹⁸ have 43 ETF products, which is a 23% increase from 2013. The value of trading was \$1.8 billion in 2014 with a 53% decrease. The share of ETFs with respect to the WFE exchanges has been 1% in terms of the number of products and only 0.01% in terms of the trading value. 91% of the value traded was executed at Borsa istanbul with 15 products.

Investment Funds

Another set of 10 OIC Exchanges¹⁹ have 721 investment funds available for trading with \$2.3 billion of trading value in 2014—a 15% increase in the number of funds yet a 38% decrease in the value of trading compared to 2013. Overall, the global share of the OIC Exchanges represented 3% of the number of investment funds available for trading and 0.5% of the value of trading in 2014.

Stock Futures

Borsa İstanbul, Bursa Malaysia, Kazakhstan Stock Exchange, Karachi Stock Exchange and Tehran Stock Exchange have stock index futures available for trading. While Bursa Malaysia did not have any trading in 2014, the numbers of contracts traded at the other four exchanges were 194,377 (BIST), 16,537 (KASE), 12.0 million (KSEL), and 174 (TSE) respectively—a 10% increase in the total number of contracts from 2013.

Stock Index Futures

Borsa İstanbul, Bursa Malaysia, Karachi Stock Exchange and Kazakhstan Stock Exchange have stock index futures available for trading. While Karachi Stock Exchange and Kazakhstan Stock Exchange did not have any trading in 2014, the total number of contracts traded at Borsa İstanbul and Bursa Malaysia was 45.5 million, which is a 5% increase from 2013.

Interest Rate Futures

Bursa Malaysia and Pakistan Mercantile Exchange were the only OIC exchanges that had interest rate futures contracts available for trading. While Pakistan Mercantile Exchange did not have any trades in 2014, Bursa Malaysia had 13,150 contracts traded—a 22% decrease from 2013.

²¹ Futures on precious metals, crude oil, and cotton

²² Tehran Stock Exchange has "embedded put options" with 180.5 million contracts traded in 2014

Currency Futures

Only Borsa İstanbul and Kazakhstan Stock Exchange have currency futures available for trading with 14.1 million and 3,900 contracts traded in 2014 respectively—a 27% aggregate increase from 2013.

Commodity Futures

Borsa İstanbul, Bursa Malaysia and Pakistan Mercantile Exchange have commodity futures available for trading with 1.6 million, 10.3 million and 3.8 million contracts traded in 2014 respectively and 15.7 million contracts in total, compared to 14.3 million in 2013. Pakistan Mercantile Exchange also had futures on precious metals, crude oil, and cotton whose total trading value is \$8.47 billion in 2014 and \$12.05 billion in 2013.

Stock Options

Borsa İstanbul is the only OIC exchange with stock options available for trading with 88,919 contracts traded in 2014—almost twice as much as the amount for 2013.

Stock Index Options

Only Borsa İstanbul and Bursa Malaysia have stock index options available for trading with 107,344 and 4,188 contracts traded respectively and 111,532 in total—more than six-fold of the 2013 value.

Currency Options

Borsa İstanbul is the only OIC exchange that has currency options. The instrument has been launched in May 2014, with 26,801 contracts traded by the end of 2014.

Commodity Options

Bursa Malaysia was the only OIC exchange that had commodity options with 714 contracts traded in 2014, compared to 2,520 in 2013.

SPOT COMMODITIES AND FOREIGN EXCHANGE²³

Borsa İstanbul has spot trading of commodities such as gold, silver, platinum, and palladium. The total value of trading of all commodities was \$9.9 billion in 2014 and \$20 billion in 2013.

The value of gold and silver trading at Borsa İstanbul was \$9.6 billion and \$265.1 million in 2014 respectively. Borsa İstanbul also has platinum and palladium products available for trading with a total trading value of \$90,125 in 2014, and \$391 in 2013.

 $^{^{23}}$ Foreign Exchange trading at the exchanges are excluded from totals due to lack of data

CENTRAL SECURITIES DEPOSITORIES

As part of the survey, 8 CSDs and 4 depository departments of exchanges have answered questions regarding the issuers, investor accounts, and the distribution of the capital markets assets.

58% of the participating OIC CSDs have omnibus accounts at the participant level, 92% have beneficial ownership accounts on an end-investor basis, 83% mandates the accounts to be segregated on an end-investor basis, and dematerialization is mandatory at 83% of the CSDs.

Below table outlines the financial instruments that are eligible for deposit at the relative CSDs:

Issuers

As of the end of 2014, there were a total of 4,123 domestic and 68 foreign issuers, and a total of 4,191 issuers, which is a 2% increase from 2013.

Accounts

There were 27,490,940 investor accounts at the end of 2014, a 7% increase from 2013. 95% of them are domestic individuals, 2% domestic corporates, 2% foreign individuals, and 1% foreign corporates.

When compared against the populations of the relative countries, the levels are closer to each other, except for Saudi Arabia where about a fourth of the population has an investment account.

Source: The World Bank, World Databank

Value of Holdings

The value of holdings at the end of 2014 was \$1.3 trillion, which is a -9% change compared to the 2013 value²⁷. 14% of this value was owned by domestic individuals, 64% by domestic corporates, 1% by foreign individuals, and 21% by foreign corporates.

Most of the CSDs had more number of accounts and value of holdings in 2014 than 2013. Exceptionally, Tunisie Clearing had a 56% increase in the number of accounts, and Kazakhstan Central Securities Depository had a 79% increase while the value of holdings decreased by 61%. The changes in the number of issuers, the number of accounts, and the value of the holdings from 2013 to 2014 are shown in the below chart:

 $^{^{27}}$ The value of holdings data for the CSDs of Pakistan and Saudi Arabia were not provided.
